The universal dispenser!

LITEC® 501

- Four devices combined in one
- One unwinder for everything
- Usable with weights up to 380 kg
- With dynamic roll-off brake!

Universally usable with:

- Core lines
- Cable rings
- Empty pipes
- Cable reels - all sizes
- Including damaged drums

4in1

LITEC® TECHNIK ...FÜR PROFIS.

LITEC®501

Unwinder in use position for cable drums

Unwinder with cable ring in place and lid

Damaged cable drum on top of unwinder

Empty pipe in unwinder

Core line cable in unwinder

The facts:

A load-dependent, maintenance-free automatic brake brings the device to a standstill after a short, controlled after-run after the cable pull is interrupted.
The braking effect of the unwinding brake always adjusts itself in its braking effect with light wire conductors as well as with heavier cable drums according to the respective weight on top of the unwinder at the time and takes into account that e.g. a heavy drum becomes lighter as it is unrolling.
The device enables trouble-free working in every direction, without watchdogs, without tangled cables, compact and space-saving design. Neither tools nor additional parts are required for retrofitting, so there is no equipment that can get lost.
Very easy to move, flat, compact, robust, maintenance-free, anti-slip and stable.
Cost savings through efficient work.

Technical specifications:

Rated load: max. 380 kg
Device diameter: approximately 50 cm
Weight: approximately 7 kg
Bezel height: approximately 77 mm

Handling of the unwinding of cable rings with attached cover

Large drum on top of LITEC-501
